Company History

Data2CD Inc. was founded in May 1998, to address the various digital conversion needs of our clients with legacy documents, microfilm records, large-format drawings, aperture cards, structured and unstructured forms.

It has been our mission to convert all types of anolog media, into an electronic format for ease of use, management, and distribution. Today Data2CD is an industry leading product and service company, specializing in consulting, capture, and content management solutions.

CONSULT | EXPERIENCE
CDIA+ Certified Document and Imaging Architect
15 years+ in area of Digital imaging and enterprise content management

CONSULT | CONCEPT
Data2CD Inc. uses a proven roadmap to deliver our "Proof of Design". We target: Requirements gathering; Functional and technical scoping; Application design, configuration and deployment ; Extensive and efficient testing; Validation and verification
